# 電競 賽程 公布管理組

(徵人)

GO 事業部規劃

未 完 成 方 向

1. a better frontpage arrangment in dbnote, apply it
2. event status section need minor correction.
3. Foolproof
   (a) (upcoming page) export to html(blog) needs run str_replace, because the greater than smaller than(google solution?)
4. Bug
   (a) when there is only grand final left, shouldn't show more match unfolding no?
   (b) we are in between day 2 and 3 of ROG, day 2 completed, day 3 not entered, event not shown in schedule announced.
   (c) because day three has not been entered timely.(nothing can be done.... ignore)
   (d) but want a link to go to the event page
   (e) GO arrangment venture flow shows no git log?
   (f) team logo not shown : there are two places of team logo, and the one matters need run collect-static before one can commit the image, rather poorly designed
   (g) team page, eg liquid, has pass event should not shown epl s8: (this should be more easy now that countdown can be shown with timeuntil) because tournament and team views code still need to be adapted to the new regime, and need cleanup
5. Code Impovement :change path, incorporate os.path.join
6. Testing
7. wanted to do? 1. upcoming events, with no match schedule? 2. (CS) email steam? db model can be integrated into their system? big mission...

資 料 庫 賽 程 管 理 特 色

1. 能有個網頁可以馬上看到想看的結果，不用在上去 Liquipedia 或 HLTV 然後要點老半天找老半天，才找的到喜歡的隊伍的賽程。
2. 可選擇模組輸入或腳本輸入
   (a) 腳本輸入使用 tts_creation_template.py 檔。此步驟在隊伍的資料庫選擇上並沒有用上賽事單位的隊伍簡寫判斷，而是按照一排好的隊伍 list，來做賽程輸入，若資料庫找不到隊伍，代表 list 中的隊伍名稱找不到對應的資料庫資料。這個狀況時，程式會允許使用者手動輸入正確的隊伍名稱。因此此方法適合比賽不多的賽事，不需要去跑格式判斷程式。編輯隊伍 list 的方法如下，從官網右鍵複製包含隊伍名稱及比賽時間的賽程表，貼上 vim，用 vim 的快速組合鍵刪除所有不需要的東西，讓每一行剩下一個隊伍名稱，並且相連的兩個隊伍就是對戰的兩個隊伍。然後用我們 note 中整理的 vim 快速組合鍵將每個名稱加上" "，讓他變成一個 python string list。編輯好後複製後就可以貼進 tts_creation_template.py 檔中。見我網站的 db note page。
   (b) 模組輸入，網頁上複製包含該網頁所有隊伍及對戰時間的表格後，貼上一 py 檔，去跑 test parsing.py，會自動分析格式取出隊伍名稱及對戰時間的程式。這對大型賽事較方便。如 ESL pro League 的巡迴賽，賽事有很多很多，就不適合手動輸入。目前在 test_scraping 資料夾。

網 頁 編 輯 特 色

1. upcoming post 已整合成可用文書處理系統 LYX 編輯，不須處理 raw html 檔。

2019-01-24 git review revised.

2019-01-24 go, dbnote, timetable, tool updated.

2019-01-24 avatar logo added. but this is not the folder for serving, collectstatic
    haven't been run.

2019-01-24 added m2m_ways soccer page.

2019-01-24 Added go matches.

2019-01-01 ASUS rog 2019 added.

2019-01-01 (fixed) Fronpage show countdown! with filter timeuntil.

2018-12-28 changeable_now 12/28-28 days.

2018-12-28 Fast unfolding, more TBD. And descriptions for each catolog. This betters show
    the coordinated structure.

2018-12-28 tournament page add start end time.

2018-12-28 By adding a sentence Event on the fly, More matches unfolding to ongoing event
    in Schedule announced. And change schedule anticipated to start date > now to limit
    only to future events. The problem of ongoing and upcoming seems to be solved and be
    satisfactory.

    View chaneable_now set to 12/28/2019 - 24 days to show this effect.

2018-12-28 project timetable, tool improv updated.

2018-12-28 upcoming views add variable_now so that we can move now time anywhere, for
    testing purpose. Moved team logo page to go group.

2018-12-26 (done) upcoming's abstract integrate into blogpost. And Other changes.

2018-12-25 timetable revised.

2018-12-25 upcoming page abstract major important revision. This brings out the value of
    this page.

2018-12-25 db added ibp 2018.

2018-12-25 past events added.

2018-12-25 (fixed) upcoming page views scode cleanup

2018-12-25 dbnote major revised. project timetable blueprint revised.

2018-12-25 (fixed) upcoming page forgot to exclude event end date in 9999 event.

2018-12-21 Added LYX html(blog) export so files ended up directly in templates.

2018-12-20 views corrected frontpage sorting of tool and project links.

2018-12-20 rm and add files.

2018-12-20 Fixed results of renaming tool_improv and projects_timetable.

2018-12-20 gitlogs medium rearrangment.

2018-12-20 dbnotes major rearrangement.

2018-12-20 views added workshop unifinshed link.

2018-12-05 1. (views.py) Added upcoming tournaments filtering. Previous fixed forgot to
    commit: Team upcomging tournament without time. Relation fields do not support nested
    lookups. (previously had fixed) event page有9999日期，要修. (fixed,tested)db op
    加入新比賽時間，
    會將原本9999的隊s伍全刪除，這樣如果只加兩場， guest就會從原本多於四隊變成四隊。

    2. (db) A. (had previously fixed)team kinguin team page error, 1. there're two
    kinguin teams 2.(deleted) wesg kinguin 7/14 game only one entry no opponent
    (remember now, its final, add the other team) B. add esl s8 day2.

    3. (csgoupcoming page) A brand new look.

    4. (dbnote) major rearrangment, koma script report style appied, in print paper a4
    report.
